Examiner Wilder:

The Applicants respectfully request that the Examiner consider withdrawing the pending Final Office Action as being prematurely issued. The Applicants have diligently pursued the prosecution in good faith and in accordance with USPTO guidelines:

The applicant who is seeking to define his or her invention in claims that will give him or her the patent protection to which he or she is justly entitled should receive the cooperation of the examiner to that end, and not be prematurely cut off ...

*MPEP §706.07 Final Rejection* [emphasis added]. Further, the Applicants have not engaged in any behavior intended to unfairly prolong the examination:

...the applicant who dallies in the prosecution of his or her application, resorting to technical or other obvious subterfuges in order to keep the application pending before the primary examiner, can no longer find a refuge in the rules to ward off a final rejection.

**Attorney Docket No. UM-07718**

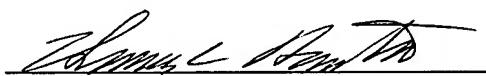

*MPEP §706.07 Final Rejection.* On the contrary, the Applicants have objectively considered the Examiner's arguments and provided claim amendments where appropriate. In response, the Examiner has withdrawn some rejections and/or objections. In other words, progress is being made on this application. A Final Rejection at this point unfairly truncates the Applicants' entitlement to a full and fair hearing:

The examiner should never lose sight of the fact that in every case the applicant is entitled to a full and fair hearing ...

*MPEP §706.07 Final Rejection.* In this case, the Examiner has improperly raised a newly cited reference that was not necessitated by the Applicants previous response. Even though Bennett et al. was asserted for anticipation to new claims, the Examiner should have provided this reference as relevant to the Original claims.

Consequently, the Applicants respectfully request that the Examiner consider withdrawing the present final office action.
